

A person's legs are shown walking on a path made of fire. The path is composed of several parallel lines of fire that recede into the distance, creating a sense of depth. The person's feet are visible, and they appear to be walking comfortably on the fire. The background is dark, making the fire stand out.

Hip Tunnel Stone

Effect Fire

There is no effect fire as realistic as the new **THE FLAME** fire! All you need is electricity, "Bio-Fluid" (distilled water), special lamps, and an ultrasonic vaporizer to create this magical play of flames, so incredibly authentic. The intensity of the flames is adjustable and thanks to the remote control it is very comfortable to operate. A ultra-fine water mist streams out and improves the quality of the air and creates a warm and cosy atmosphere. The burning time with one tank filling (manual filling) is approx. 6-8 hours.

EFFECT FIRE HIP 50

Hip 50 Front Stone-Wood

Hip 50 Tunnel Steel

Advantages

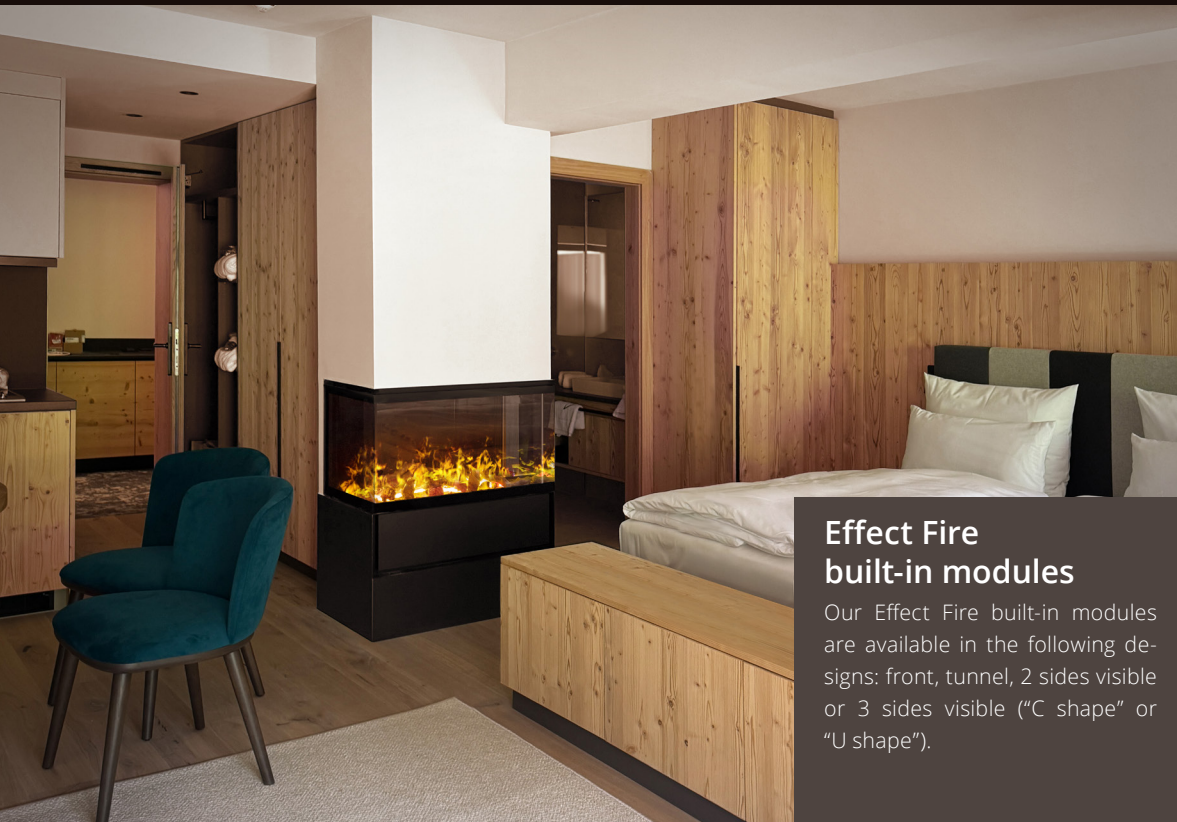

- Very realistic flames with no fire risk
- operates on distilled water
- childproof
- no risk of hot surfaces
- no chimney required
- creates a healthy indoor climate
- plug and play installation
- Endless Effect Fire by modular system
- adjustable flames
- including remote control
- automatic filter & filling system
- CE-approved

Very easy to install.
E.g. Niche with 230V connection.

Equipment of the Effect Fire built-in modules

back wall glass black - elegant depth and mirror effect

removable **front glazing** - bronze glass - offers a perfect view with high contrast even during daytime

side glass - **mirror** - for perfect, continuous side views

receiver for **handy remote control** - standard

Maintenance drawer:

- access to burner
- filling
- main switch
- flame intensity control
- service

wireless remote control optional

Flame length with 50 cm

ELECTRIC EFFECT FIRE

Manual filling

- **Burning time:** 4 - 7 hours

Preparation (on site):

- **[A]** flexible power cable with a current line plug and a power connection 230 V

Connection to the power supply

Manual filling:

- open the control drawer, pull out the drawer
- lift up the water tank, fill it with "Bio-Fluid"
- reinsert the water tank - push the drawer in

Fully automatic filling:

Preparation (on site):

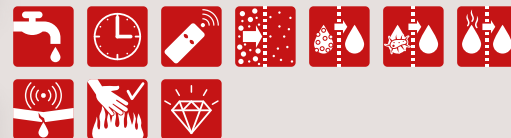

- **[B]** osmosis water pipe from the "O-Box" (drawn in the empty pipe)
- **[C]** power and control cable (5 x 1.5 mm², drawn in empty conduit)

Connection:

- connection to the power and control line
- connection to osmosis water pipe

Fluidmatic

The **automatic filter and filling** system „Fluidmatic“ for effect burners provides comfort and safety. The permanently connected filter and reverse osmosis system - **O-Box** - is the optional „fuel source“ for electric effect fire appliances, including a pump, timer, and various filters.

O-Box - preparation (on site):

- supply fresh water
- drainage - waste water
- power connection 230 V

The power control cable and the osmosis line (Bio-Fluid line) of the Endless Fire Box are connected to the O-Box.

The **O-BOX-READY** pictogram identifies all built-in modules that are prepared for fully automatic filling!

INNOVATION LOW & SPHERE

Low with link chain

The new **"Low"** model fits perfectly into the room structure and offers a beautiful, romantic campfire ambience. Due to the LED ambient lighting, the noble fire table „LOW“ appears to float above the ground as a stone, steel or wood disc. The glazed fire basket with revolving door "guards" the fire and lets its flames shine with even more contrast.

Also available as gas fire and ethanol fire.

Available in different diameters, square or rectangular.
standard: 150, 175 or 200 cm.

Sphere

"Sphere" - the latest creation from **THE FLAME**. The fireball is attached to the ceiling and thus floats in the room, just above the ground, several in a high lobby, above the pool in the suite ... wherever - an eyecatcher of luxury, coolness and innovation. With many different color options the **"Sphere"** becomes a high-light in every ambience.

Available in many colors and surfaces.
Standard: gold matt, ø100 cm,
firebox approx. ø65cm

SPARKLING CRYSTAL

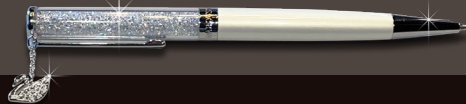

Sparkling Crystal

Hip 50 Front with Sparkling Crystal - back wall

Sparkling crystal fire - The new exclusive line "**Sparkling Crystal**," combining an electrical effect fire with incredibly sparkling crystals, comes to life in the romantic light of the flames, offering a thrilling experience. The inspiration for this glamorous addition to our beautiful fireplaces arose not only from the geographical proximity to the crystal market leader "**SWAROVSKI**" but also from the desire to enchant you with the interplay between fire and sparkling crystals. Each of our "**SPARKLING CRYSTAL**" models comes with a complimentary "**SWAROVSKI Crystal Pen**" as a gift.

ELECTRIC EFFECT FIRE

Fly Sky - individuell

“Hotel & Home Interior” - Sophisticated living thrives by creating a harmonious overall impression where one element suits and complements another! That is why **THE FLAME** has now extended its exclusive fire program of quality lighting features with LED real wax candles. Noble, flickering candle tables and lanterns (all controlled by remote control and with a flexible timer) set the tone and give any room a warm, soft glow. Enjoy the candlelight and flames with no soot or fire risk - but with an easy-to-use timer. Your candles “light” themselves. You will be enchanted and inspired.

LED Candles
with remote control

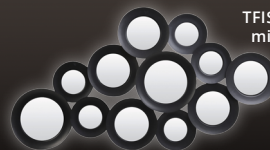

This flickering canopy of candles captivates and enchants equally. Simply install **"Fly Sky"** with premium sparkling black glass canopies on the ceiling and bask in the beautiful flickering sea of lights. LED wax candles, with an incredibly realistic real flame effect and a radiant body, create this romantic ambiance of light and fire.

GAS FIREPLACE | INSERTS BURNERS

THE FLAME Gas Fireplace Inserts

The new generation of THE FLAME gas fireplaces is powered by natural gas or LPG. Available in both an open decorative fire version and a closed fireplace version for heating, they can meet various individual needs. All fireplaces (up to a length of 7 m) are available in front, tunnel, 2 sides visible, or 3 sides visible ("C shape" or "U shape"). Needless to say, THE FLAME also offers the corresponding air exhaust system.

Enjoy our latest technology "LOGFIRE" -
with super-realistic fire - flames direct
out of logs.

GAS FIREPLACE | INSERTS BURNERS

OPEN OR CLOSED GAS FIREPLACES

Open gas fireplace

Open gas fireplaces offer a romantic, open-fire experience, satisfying every individual desire. Combustion is regulated by the air in the room or through a fresh air conduit, and gases are discharged through a chimney, preferably moisture-resistant.

Closed gas fire-place with
air exhaust system

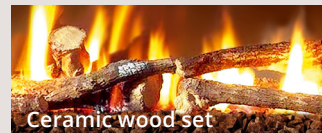

Closed gas fireplaces offer a safe fire experience, along with efficient heating through convection openings. The concentric fire-place system features a double-wall structure, providing a single conduit for exhaust and combustion air, working independently of the room's air. Enhance the ambiance with our decorative ceramic „wood,” stones, and Superglow for an incomparable image around your fireplace.

Firebox

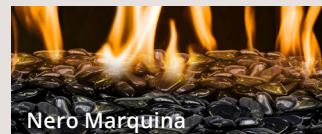

Our optional ceramic wood sets, decorative stones, and Superglow offer an incomparable fire ambience.

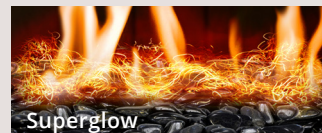

Lava broken

Ceramic wood set

Nero Marquina

Superglow

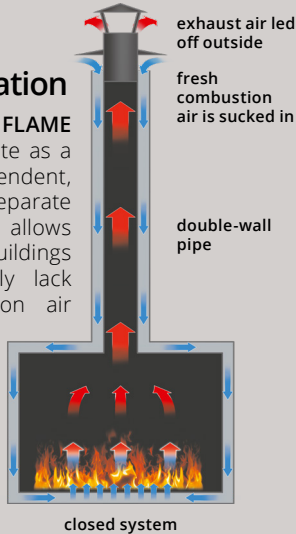

Balanced Flue System

The balanced flue system by **THE FLAME** is a concentric stainless steel chimney with two parallel passageways. The inner pipe serves as an exhaust pipe for smoke/gas, while in the annular gap between the inner and outer pipes, fresh combustion air is simultaneously drawn in.

Mode of operation

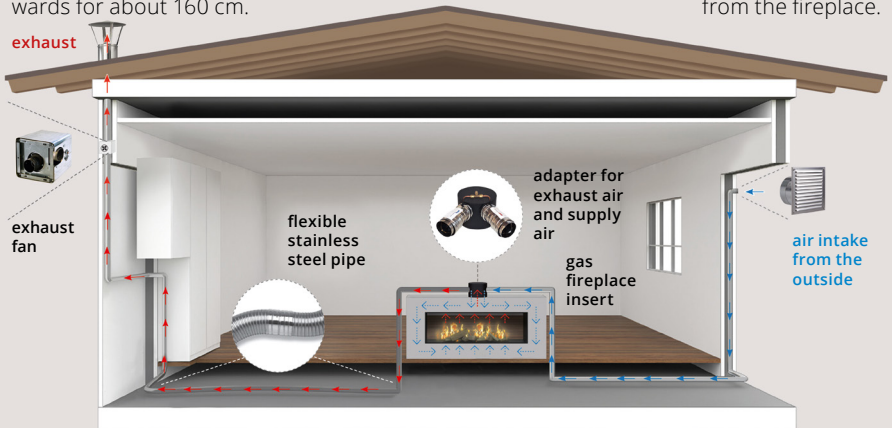

With this system, **THE FLAME** gas fireplaces operate as a completely independent, closed system, separate from room air. This allows for installation in buildings that would typically lack sufficient combustion air due to their airtight construction. **THE FLAME** - State of the Art.

Fan-assisted exhaust system - Fan-Flex-Flue

A fan-assisted exhaust system designed for flexible installation of the exhaust and combustion air pipe. The pipes can be routed flexibly, whether in the floor, on ceilings, on walls, etc., and can even be directed downwards for about 160 cm.

An exhaust fan, supported by various components (flow switch, speed control, etc.), ensures optimal flue draft and the secure removal of exhaust gases. The fan must be installed with a minimum distance of 5 m from the fireplace.

Unique, individual controls

- remote control
- wall switch
- timer
- clock timer
- motion sensor
- dimmer switch
- iBus and much more
- **THE FLAME** Gas-App

THE FLAME
Gas-App
Optional for
control of all

Make your dream home a reality today!

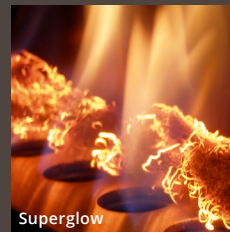

With **THE FLAME** you can create rooms for relaxation and wellbeing. An open fire, blazing flames and a pleasant room climate are very inviting for resting and leisure. Fire furniture from **THE FLAME** does not require the insertion of a flue, and it is suitable for all living areas. You can set it up easily, fill it with fuel, light it and enjoy the glorious fire. "**BIO-FUEL Indoor**" (fluid alcohol-based fuel) is produced from renewable raw materials, it is food-safe, it produces no smoke when it burns and it leaves no residue at hot air (1.5-2.9 kW). Eliminating the tiresome task of chopping wood, with no dangerous sparks, soot or ash.

THE FLAME ... wherever you desire!

THE FLAME offers a number of high-value decor fire furniture and is something of a perfect eye-catcher. Use **THE FLAME** wherever you want (living room, kitchen, terrace, garden, reception area, lobby, restaurant, suite, wellness area, ...)! For optimal utilization of **THE FLAME** products in public areas, we are prepared to provide customized documentation tailored to your boiler room specifications, including room size and air exchange details that you furnish to us.

Filling - Ignition - Regulation

1. Bottling

THE FLAME products have a tap which allows for the safe bottling (stopping) of combustion fuel.

2. Filling

You will be provided with a filling container with a designated capacity matching that of the boiler to prevent overfilling.

3. Ignition

You will receive an ignition and regulation key to ensure safe and controlled ignition.

4. Regulation

All "Free-Flame Burners" and band burners are adjustable.

Always be safe ... with THE FLAME!

Stability

All **THE FLAME** fire products are tested for stability! No systems or devices are located on rollers and torches are reinforced or equipped with a sway or splash guard.

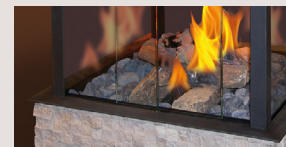

Ventilation

The bottom-up ventilation in all fire areas/systems not only ensures optimal complete combustion and a fine high flame but also serves as the best security measure in case of any misuse by the user. As hot steam is reduced above, the risk of injury is almost eradicated.

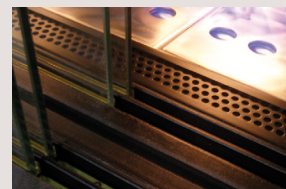

Contact protection glass:

Profiles of contact protection glass for all models prevent direct access to hot components by small children (as well as "big children").

Double glazing

Ventilated double glazing with built-in appliances eliminates the risk of burning on hot glass surfaces (optional).

ETHANOL FIRE INDOOR
